Septic Issues

Please do not throw anything into your toilets except RV biodegradable toilet paper! **DO NOT THROW FLUSHABLE WIPES INTO YOUR TOILET!** Our septic system works with a set of pumps to transfer the waste to drain fields. Wipes that are flushed end up clogging our pumps. These blockages, aside from the unpleasant odor, have to be cleared by hand by removing the pump. If the blockage is significant it can stress the motor to the point of burnout.

Air conditioners

FOR YOUR **AIR CONDITIONER(S)** TO RUN EFFICIENTLY, COOL YOUR TRAILERS, AND NOT CAUSE ELECTRICAL SURGES THEY MUST BE CLEANED AND MAINTAINED. YOU CAN DO IT YOURSELF.

Clean your air conditioners for best performance !

- If cottonwood or dust is on outside panels, turn off your air, and wash panels from top to bottom using a spray nozzle & water or just vacuum.
- If panels are really dirty, please maintain and have a professional clean with chemicals.

We use a smartphone app to notify campers about maintenance of the water and electric or other important, time sensitive matters. The app features our weekly activity newsletter in the News module and the Nearby module features local area entertainment, restaurants, events, shopping, services and attractions. Get the app on Apple on iTunes or GooglePlay for Android phones.

Extreme Heat Warning

We will be full this weekend and, in the past, have experienced issues with ComEd not bringing in adequate electricity during heat waves.

If the consumption of electricity in the surrounding communities is excessive, everyone, including Fish Lake, will receive less power.

To help avoid outages we suggest the following:

Reduce your overall electric consumption during this, or any heat wave. Shut off everything possible.

Your air conditioning will work at its most efficient state if the outside of the system is clean and has been serviced.

Surge protectors will shut your unit down if not enough electric is available or if the voltage changes 2-3 volts when other trailers AC starts up.

If a FLB fuse blows and there is an outage in your area, there are numerous reasons that cause this (including an air conditioner that needs servicing), but the solution is always the same: **we replace the fuse and the campers in that section must reduce their electric consumption. If they do not, outages will continue to happen.**

Please use only one air conditioner. In this heat our grid will not support the use of multiple air conditioners in one trailer.
