We highly recommend the use of surge protectors in your trailer.

Air Conditioners

FOR YOUR **AIR CONDITIONER(S)** TO RUN EFFICIENTLY AND avoid ELECTRICAL SURGES THEY MUST BE CLEANED AND MAINTAINED. If cottonwood or dust is on outside panels, turn off your air, and wash panels from top to bottom using a spray nozzle & water or just vacuum. If panels are really dirty, have a professional clean with chemicals.

Extreme Heat Warning

We will be full this weekend and, in the past, have experienced issues with ComEd not bringing in adequate electricity during heat waves.

If the consumption of electricity in the surrounding communities is excessive, everyone, including Fish Lake, will receive less power.

To help avoid outages we suggest the following:

Reduce your overall electric consumption during this, or any heat wave. Shut off everything possible.

Your air conditioning will work at its most efficient state if the outside of the system is clean and has been serviced.

Surge protectors will shut your unit down if not enough electric is available or if the voltage changes 2-3 volts when other trailers AC starts up. Some surge protectors are too sensitive and will constantly shut down your elec. We have a brand we recommend. See YC

If a FLB fuse blows and there is an outage in your area, there are numerous reasons that cause this (including an air conditioner that needs servicing), but the solution is always the same: **we replace the fuse and the campers in that section must reduce their electric consumption. If they do not, outages will continue to happen.**

Please use only one air conditioner. In this heat our grid will not support the use of multiple air conditioners in one trailer.

FLB's First Food Truck of 2021 Season is coming!!! Taco's Locos Food Truck is next weekend July 10th from 11a-2p. They will be by the pavilion. More news to follow...
