Electric Tips

We highly recommend the use of surge protectors in your trailer.

Air Conditioners

FOR YOUR **AIR CONDITIONER(S)** TO RUN EFFICIENTLY AND avoid **ELECTRICAL SURGES** THEY MUST BE CLEANED AND MAINTAINED. If cottonwood or dust is on outside panels, turn off your air, and wash panels from top to bottom using a spray nozzle & water or just vacuum. If panels are really dirty, have a professional clean with chemicals.

Pool News

*To respect those attempting to socially distant, please **DO NOT MOVE DECK CHAIRS**. COVID is still present.

*Please do not send your children (under 12 yrs.) to the pool or beach to be watched by lifeguards. Children must be attended to by their parents, guardian or another adult.

*Lifeguards are allowed insulated coolers since their shifts run 6 hours and they must stay cool & hydrated to be alert and able.

Patrons may **NOT** have any beverages except water in clear plastic containers. Sugary drinks of any kind that drip or spill will attract bees. Stings hurt all, but are a life threatening emergency for others.

Beach News

No Lily Pad mats/inflatables are allowed in our swimming area or on the lake.

Super Sites

Every summer for the past twenty plus years, Fish Lake has awarded two sites in June, July and August with the honor of Super Sites. An outdoor super site sign and a \$100 check are given. Judges will be looking at the sites throughout the weeks. How does your shed look? Weeds in the driveway? Deck & Trailer clean? What about the back of your unit? Work hard and you to could be a super site! July Super Sites Announced at the August 7th dance at 9p.

If the consumption of electricity in the surrounding communities is excessive, everyone, including Fish Lake, will receive less power.

To help avoid outages we suggest the following:

Reduce your overall electric consumption during this, or any heat wave. Shut off everything possible.

Your air conditioning will work at its most efficient state if the outside of the system is clean and has been serviced.

Surge protectors will shut your unit down if not enough electric is available or if the voltage changes 2-3 volts when other trailers AC starts up. Some surge protectors are too sensitive and will constantly shut down your elec. We have a brand we recommend. See YC

If a FLB fuse blows and there is an outage in your area, there are numerous reasons that cause this (including an air conditioner that needs servicing), but the solution is always the same: **we replace the fuse and the campers in that section must reduce their electric consumption. If they do not, outages will continue to happen.**

Please use only one air conditioner. In this heat our grid will not support the use of multiple air conditioners in one trailer.
