Electric Tips

We highly recommend the use of surge protectors in your trailer.

Help Avoid Power Outages When Temps Soar

When electricity consumption during heat waves becomes excessive, ComEd customers, including FLB, receive less power. This increases the chance of power outages. Seasonal campers can help prevent these by:

-Reducing overall electric consumption. Shut off *everything possible*.

-Use only 1 air conditioner. Our grid will not support using multiple air conditioners in one trailer during a heat wave.

-Surge protectors will shut down your trailer if insufficient power is available or the voltage changes when other trailers' air conditioning is turned on.

-Please install CampersApp and set notifications for ON. If an outage occurs, we use CampersApp to inform campers of the status.
